
(a)
$W(m)/\varepsilon$
m
measured
single $\kappa = k_z^F$
$\kappa = k_z^F + \mathbf{b}_\perp \cdot \mathbf{k}_\perp$ (Gaussian)
traced $P(\kappa)$, injected pattern
traced $P(\kappa)$ of g_0
formula, $\kappa = k_z$
(b)
rate $\times T$
m
$D_\perp(m)\,T/W(m)$
$D_\nu(m)\,T/W(m)$
